

Add new nations to the Resource Server

On the tab Nations in Resource Server customer defined nations can be added.

With a click on the plus sign in the top right corner a new row is added

The screenshot shows the 'Resource Server' application interface. The 'Nations' tab is active, displaying a table with columns: Name, ISO Code, IOC Code, Package Name, Flag icon, and Actions. The table lists various nations such as Afghanistan, Albania, Algeria, etc. In the top right corner of the table area, there is a yellow plus sign icon and a copy icon.

Name	ISO Code	IOC Code	Package Name	Flag icon	Actions
Afghanistan	AFG	AFG	ResourceServerStockPackage		
Albania	ALB	ALB	ResourceServerStockPackage		
Algeria	DZA	ALG	ResourceServerStockPackage		
American Samoa	ASM	ASA	ResourceServerStockPackage	-	
Andorra	AND	AND	ResourceServerStockPackage		
Angola	AGO	ANG	ResourceServerStockPackage		
Anguilla	AIA	AIA	ResourceServerStockPackage	-	
Antarctica	ATA	ATA	ResourceServerStockPackage	-	
Antigua & Barbuda	ATG	ANT	ResourceServerStockPackage		
Argentina	ARG	ARG	ResourceServerStockPackage		

Add the name ISO Code and IOC code to the newly added row

The screenshot shows the 'Resource Server' application interface. The 'Nations' tab is active, displaying a table with columns: Name, ISO Code, IOC Code, Package Name, Flag icon, and Actions. A new row, 'Userdefined Nation', has been added at the top of the table, with ISO Code 'UDN' and IOC Code 'UDN'. The rest of the table content remains the same as in the previous screenshot.

Name	ISO Code	IOC Code	Package Name	Flag icon	Actions
Userdefined Nation	UDN	UDN		-	
Afghanistan	AFG	AFG	ResourceServerStockPackage		
Albania	ALB	ALB	ResourceServerStockPackage		
Algeria	DZA	ALG	ResourceServerStockPackage		
American Samoa	ASM	ASA	ResourceServerStockPackage	-	
Andorra	AND	AND	ResourceServerStockPackage		
Angola	AGO	ANG	ResourceServerStockPackage		
Anguilla	AIA	AIA	ResourceServerStockPackage	-	
Antarctica	ATA	ATA	ResourceServerStockPackage	-	
Antigua & Barbuda	ATG	ANT	ResourceServerStockPackage		

Mapping a custom flag (which has to be present as a resource under the flag tab) is possible with a click on the little flag symbol at the end of the line.
