

Tutorial: SiusRank Athlete Portrait

How to insert athlete pictures in SiusRank

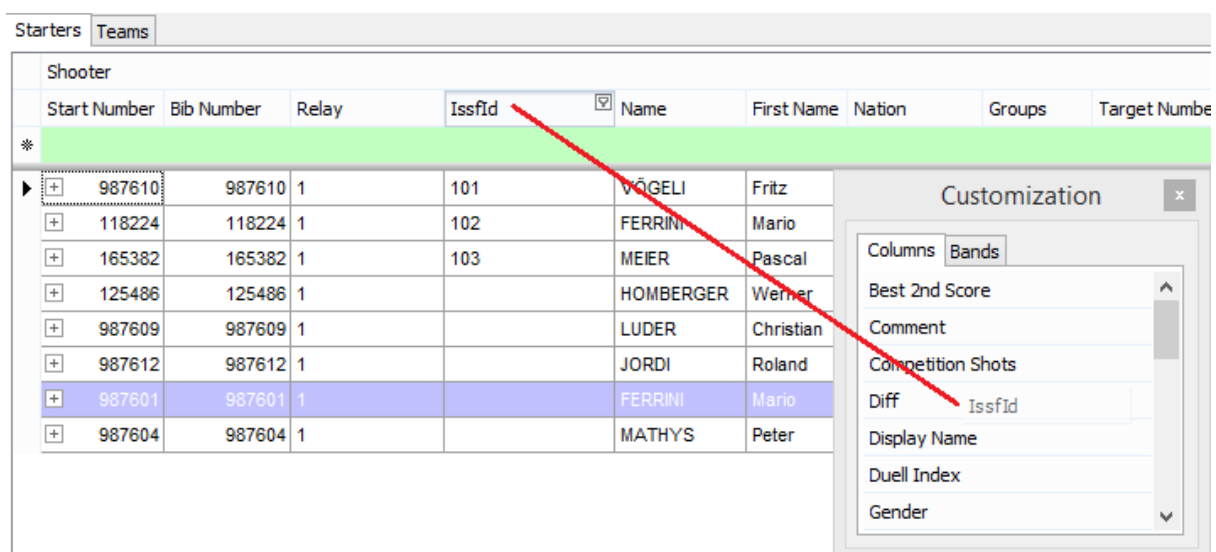

Intro

This tutorial will show, how to insert athlete pictures in SiusRank. There are two ways to realize this.

Option 1: ISSF-ID

Make the link between the image and the ISSF-ID.

- To do so you have to add the column "Issfld" with the "Column/Band Chooser".
Right click on the header → "Column/Band Chooser".
- Then fill it with any number, for example the athlete Start Number.
- Save the athlete picture in the database under ...\\Imports\\ExternalData\\EntryData
- Name the athlete picture according to the Issfld, e.g. "101.jpg".

The screenshot shows the 'Starters' tab in SiusRank. The main table has columns: Start Number, Bib Number, Relay, Issfld, Name, First Name, Nation, Groups, and Target Number. The 'Issfld' column is highlighted in green. A red arrow points from the 'Issfld' column header to the 'Diff' field in the 'Customization' panel, which has a value of 'Issfld'. The table contains the following data:

Start Number	Bib Number	Relay	Issfld	Name	First Name	Nation	Groups	Target Number
987610	987610	1	101	VÖGELI	Fritz			
118224	118224	1	102	FERRINI	Mario			
165382	165382	1	103	MEIER	Pascal			
125486	125486	1		HOMBERGER	Werner			
987609	987609	1		LUDER	Christian			
987612	987612	1		JORDI	Roland			
987601	987601	1		FERRINI	Mario			
987604	987604	1		MATHYS	Peter			

Option 2: Assign the picture in the Startlist

Assign one picture for each athlete in the startlist.
This has to be done everytime you set up a database.

- On the Championship Layer add the Column "Portrait" with the "Column Chooser".
Right click on the header → "Column Chooser".
- Then select an athlete, right click in the column "Portrait" and click "Load".
Load the picture from your Harddrive.
