

SIUS LON Utility

A support software which evaluates the condition of our optical targets in the whole range

SIUS LON Utility

1. Go to Tools – Network and click on «Search» to search for all connected devices
2. Mark (yellow) the optical targets you want to check
3. Go to Tools to open SIUSRangeCheck

SIUS RangeCheck

4. Check the number of selected targets at «Devices»
5. Click on «Check Range» and wait until it is completed
6. Go to File to Save Data
(*Don't Send Data*)
Then put it into a Zip-file
and send it to:
support@sius.com
