Tutorial: SIUSRank Online Publishing

How to publish results online

Intro

This tutorial will show, how to publish results on an online platform. If this feature is available depends on the license option you have purchased. For further information contact <u>sales@sius.com</u>.

The data is stored on a hosted service provider. To identify the right customer we use tags. This tag can be chosen freely. It is the duty of every customer to choose a tag which is not guessable from other people. Is the tag known, other instances are able to upload to your competitions.

Prepare for uploading

The competition where the upload should happen has to be prepared. Championships, Location, Country, Date Time Zone and Disciplines must be set. After define championship related entries change to the Online Publishing tab on championship level.

On this screen are several options:

Name		General Online Publ	ishing Penalties	Records Shooter G	Groups Medal Prese	nter Sius Internals

	-	Set Export					

- **Search**: with a click on the search button you can search for any customer specific tags
- Tag Box: edit box to enter the tag u want to create or search for
- **Create New**: when the search for a tag did not succeed, this button will become available to create a new tag.

Use Case: Create a new customer tag

Enter any tag in the edit box and hit the search button. There is no result in the grid, so we have to create a new one with a click on the button "Create New...".
