2 Introduction

2.1 About this Manual

To set up a championship and its database from the very beginning, proceed with the steps in this manual, namely in exactly that order.

As an example, we will consider the discipline Air Rifle 60 Men.

2.2 About SIUSRank

SIUSRank is a software used to conduct and rank International competitions, and to organize entire Championships.

Start and rank lists are automatically created and can be printed.

Live results and target pictures are shown on a spectators screen.

SIUSRank imports the shot data from SIUSData by TCP/IP, and they run optionally on the same or separate computers.

3 First time Setup

1. Install SIUSRank (At least version 7.16)
2. **Optional:** Go to C:\SIUS\SiusRank\Resources\Templates\
and copy all templates of competitions that you do not need to:
C:\SIUS\SiusRank\Resources\Templates\notUsed
So that they do not appear in the list anymore. (e.g. 25m / 50m / 300m Events)

4 Order a license for your competition

1. Go to results.sius.com/Member
or in SIUSRank click on „Help“ → „Online Help“
2. Enter to the Member Services
3. Register a new account
4. Or log in with your existing account
5. Generate a license file
 - Enter the Name of the Championship
 - Enter the organizing Country
 - Enter the Date of the Championship
 - Order License, it will be sent to your email address immediately

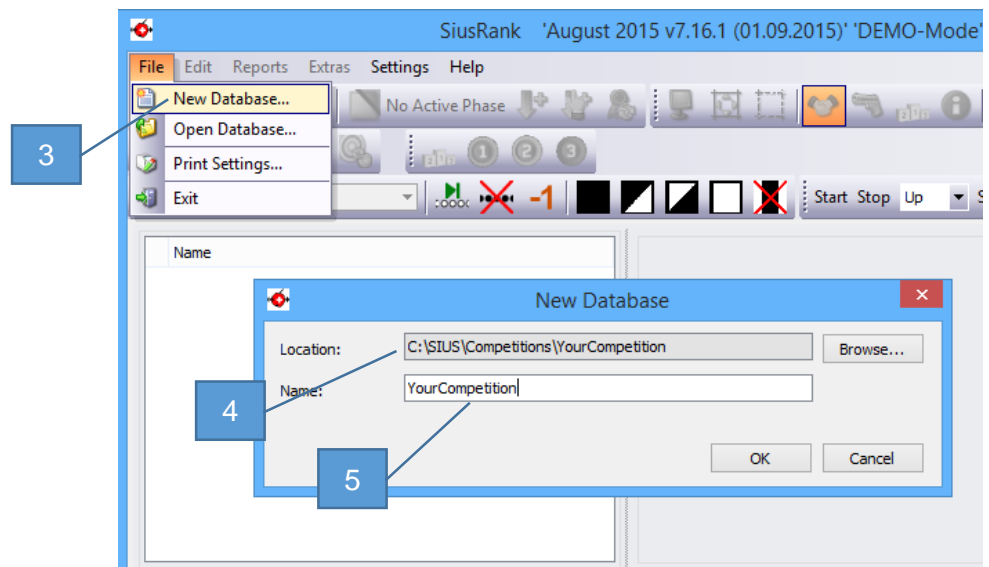

The License is valid 14 days before and after the chosen date.

5 Create a Database

Hint: SIUSRank needs a database, which includes at least a license file, a .srk database file and a folder for exports.

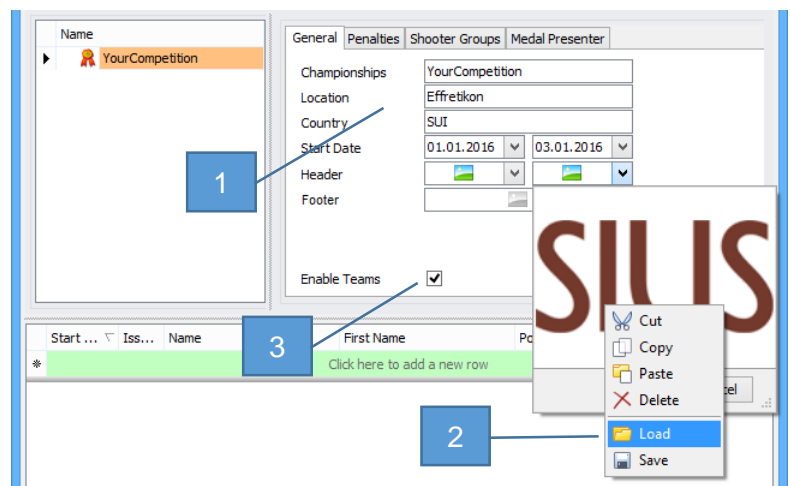

1. Create a new folder for your SIUSRank Competition Database
e.g. C:\SIUS\Competitions\YourCompetition
2. Copy the received license file to your Database folder
3. Go to „File“ → „New Database...“
4. Enter the path of your Competition Database folder
5. Enter the exact same Name like on your license

6 Competition Setup

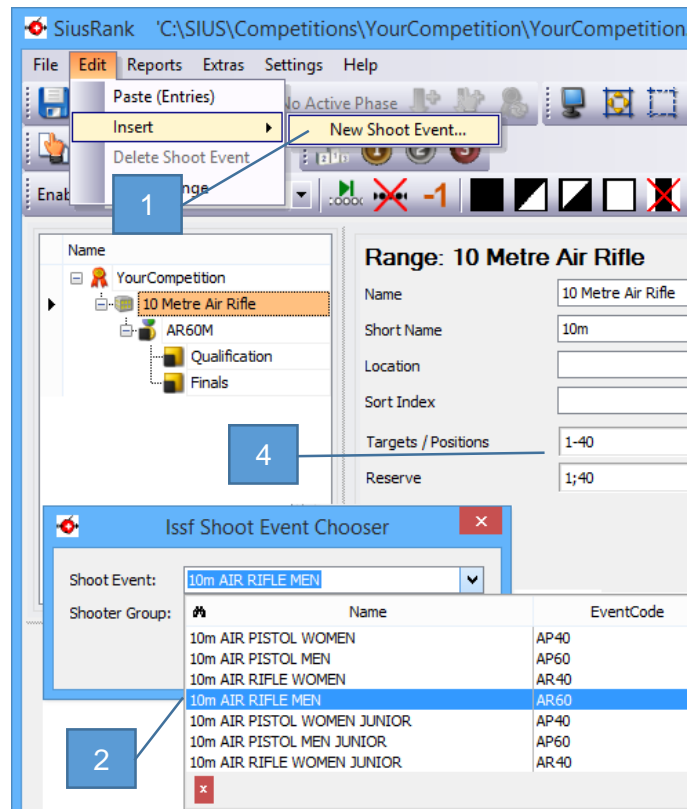

6.1 Championship Layer

1. Enter the location and date of the championship (is displayed on the spectators screen)
2. If desired, insert a Header and Footer logo
- Right click on the blank space
- Load from the hard disk
3. If desired, enable Teams

6.2 Range Layer

1. Insert a New Shoot Event...
2. Choose the discipline you want to shoot e.g. Air Rifle 60 Men
In most cases, the Shooter Group is "Regulars"
3. Repeat this two steps for all disciplines, that are included in this championship.
4. Define the number and position of the targets for Qualification and Final.
Define spare lanes as well.
(On spare lanes, no shooters are allocated.)

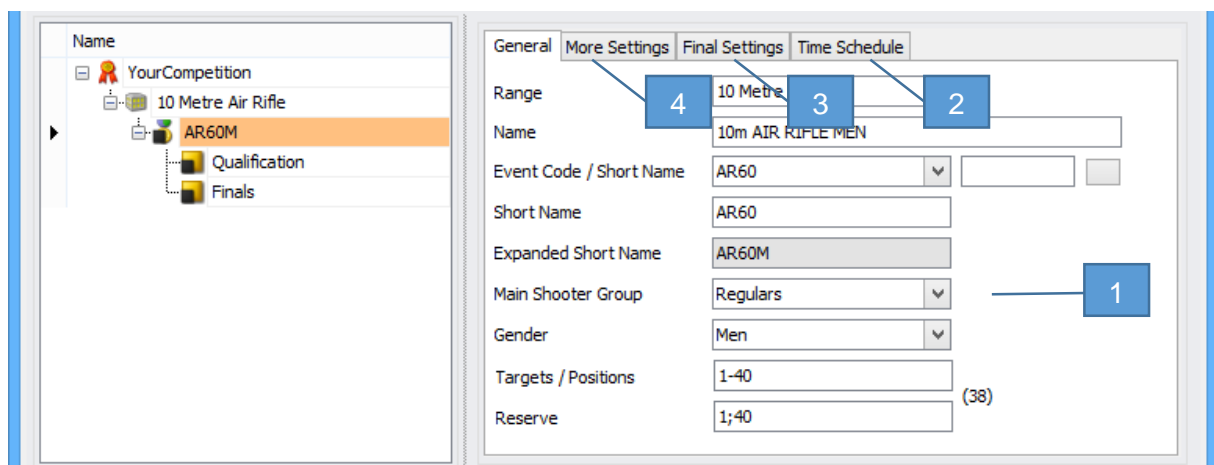

6.3 Event Layer

1. Look over Main Shooter Group, Gender and Targets / Positions.
2. Set Time Schedule correctly.
3. Look over "Final Settings"

Default settings should do it for all other settings, but it is possible to modify them, e.g.

4. Perform Eliminations? "More Settings" → "Structure" (Yes / No)
Team Settings: "More Settings" → "Others" (Team Size and Best of Team)

6.4 Phase Layer

1. Create a start list in Excel (Name the header exactly like in SIUSRank) and copy it to the clipboard.
2. Go to "Edit" → "Paste Entries..."
(If the import of the start list fails, the exclamation mark gets yellow, there you will find further information).
3. If you need more than one relay, go to settings and set number of relays. Then press "Reorganize Relais"
4. Create a start list (a PDF and a CSV file will be saved in the Exports folder)

The screenshot illustrates the software interface during the data import process. In the background, an Excel spreadsheet is open with the following data:

Start Number	Name	First Name	Team
156636	Kessler	Dionys	
118224	Ferrini	Mario	
110071	Geissmann	Guido	

The SIUSRank application window shows the 'Edit' menu with 'Paste (Entries)...' highlighted. The 'Settings' window is open, showing 'Number of relays' set to 1 and the 'Reorganise Relais' button. The 'Starters' window displays the imported data in a table:

Start Number	Bib Number	Target N...	Name	First Name	Nation	Groups	Team	Birth Day	Status	Progres
156636	156636	-1	KESSLER	Dionys		Regulars		01.01.0001	Default	
118224	118224	-1	FERRINI	Mario		Regulars		01.01.0001	Default	
110071	110071	-1	GEISSMANN	Guido		Regulars		01.01.0001	Default	
110195	110195	-1	BEUSCH	Markus		Regulars		01.01.0001	Default	
152950	152950	-1	MATHYS	Peter		Regulars		01.01.0001	Default	
100582	100582	-1	BRAUN	Reto		Regulars		01.01.0001	Default	

You made it! You can proceed with the Step-by-Step manual "Qualifications and Finals".
